

**REMARKS**

Applicants have made proper amendments to correct only minor formal matters in the Specification and in Claims 11 and 22. No other changes have been made. No new matter has been added by this amendment. It is submitted that the application, as amended, continues to be in condition for allowance.

Specifically, by virtue of this amendment, Claims 11 and 22 have been amended pursuant to the Examiner's suggestions in the Office Action dated December 20, 2005. No new matter was added by these clarifying amendments to the claims. These amendments were made only to correct minor formalities and not for patentability or to further limit the claims in view of any prior art.

Additionally, the Applicants have made amendments to the specification as suggested by the Examiner in the Office Action dated December 20, 2005. No new matter was added by these clarifying amendments to the specification. These amendments were made only to correct minor formalities and not for patentability or to further limit the claims in view of any prior art.

Reconsideration and allowance of the application in view of the above clarifying amendments to Claims 11 and 22 and to the specification are respectfully requested. It is believed that the application continues to be in condition for allowance, which allowance is respectfully requested.

No amendment made was related to the statutory requirements of patentability unless expressly stated herein. No amendment made was for the purpose of narrowing the scope of any claim, unless Applicants have argued herein that such amendment was made to distinguish over a particular reference or combination of references.
